DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to the claims rejected by Kusche et al have been considered but are moot in view of the new ground(s) of rejection. The previous indication of allowable subject matter is withdrawn in light of further consideration of the art of record.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-8, 10, 11, 14, 15, 17, 20, 21, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Geyer (2060565).

There is a flywheel 10, an elastomer ring 20, and a ring with teeth 15. In regard to claim 3, the limitation of the subassembly is a method concept and therefore given little weight in an apparatus claim.

Claims 1, 5-8, 10, 12, 14, 17, 19, 20, 21, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Henrich (2779211).

There is a flywheel 13, an elastomer ring 18, and a ring 17.

Claims 1, 2, 5-10, 13, 14, 16-18, and 20-24 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 8-42637.

There is a flywheel 15 with teeth, an elastomer ring 5, and a ring 6. The assembly is on an outboard engine 1.

Allowable Subject Matter

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
